Trella Test Automation Challenge

Part 3: Test Cases Coverage

High-Level Scenarios Checklist for Uploading POD

- ✓ Ensure the application launches successfully and displays the login screen.
- ✓ Verify the Mobile Number field is visible, accepts a valid mobile number format, and displays appropriate error messages for invalid input.
- ✓ Validate the Password field is visible, accepts valid credentials, and provides error handling for incorrect input.
- ✓ Confirm that clicking the Login button navigates the user to the landing page.
- ✓ Verify that the application prompts for location services access after login.
- ✓ Ensure the application handles both allowing and denying permissions as expected.
- ✓ Confirm that clicking "My Loads" in the navigation menu successfully navigates to the corresponding page.
- ✓ Ensure the "Past Shipment" tab is accessible and displays a list of past shipments.
- ✓ Verify that shipments marked as "PODs not uploaded" are correctly flagged when applicable.
- ✓ Confirm that selecting a shipment navigates the user to its details page.
- ✓ Validate that the "Add Documents" button is visible and functional.
- ✓ Verify that the application prompts for camera access when the "Add Documents" button is clicked.
- ✓ Ensure the application handles both allowing and denying camera permissions as expected.
- ✓ Confirm that users can select the type of document while capturing it.
- ✓ Verify that the uploaded document appears in the "Documents" section.
- ✓ Ensure the document type (POD) tag is displayed over the uploaded document.
- ✓ Confirm that the shipment status updates from "PODs not uploaded" to "POD uploaded" after the upload is completed.
- ✓ Verify that the updated shipment status persists after refreshing the page or restarting the application.
